ABOUT ME

I'm a **Game QA Analyst** passionate about delivering high-quality gaming experiences through meticulous testing and creative problem-solving. Over the past 5+ years, I've worked with studios like **Dedalord Games**, **Globant** and **The Sandbox**, specializing in mobile, PC, and console QA. Proficient in **Unity** and **Unreal Engine**, I combine strong technical skills with a gamer's mindset to help teams create immersive, stable, and engaging worlds.

EDUCATION

UTU Buceo - ITS

Technological Baccalaureate
2012 - 2015

Colegio América

(America School and Lyceum)
2008 - 2011

PROFESSIONAL EXPERIENCE

Senior Game QA Analyst

Dedalord Games - May 2024 - Oct 2025

As Senior QA Analyst at a mobile-focused studio with over 100M downloads, I ensure product quality through testing and collaboration with multidisciplinary teams.

- Functional and regression testing for mobile titles developed in Unity.
- Creation and execution of detailed test plans and test cases using TestRail.
- Involvement in AI-related workflows: LLM pipelines, checkpoints, and automated validation.
- Collaboration with cross-functional teams to ensure gameplay balance and performance stability.
- Supported ongoing optimization efforts for mobile performance and user experience.

QA Analyst

The Sandbox - Dec 2023 - Apr 2024

Worked within a blockchain-based metaverse project, performing QA to maintain playability, functionality, and consistency across user-generated experiences.

- Executed structured test suites for blockchain-based metaverse experiences.
- Validated player interactions, game logic, and visual consistency in Unity.
- Designed and documented test results in Notion, Jira, and TestRail.
- Assisted in level creation and testing using VoxEdit tools.

Advanced Game Analyst / Jr. Game Quality Analyst

Globant (Warner Bros. Games Contractor) - Apr 2021 - Mar 2023

Contributed to the testing and optimization of AAA and mid-size game projects, collaborating closely with developers and designers to enhance gameplay quality.

- Tested across multiple platforms (PC, Xbox, PlayStation) using development kits.
- Debugged and validated game features through Unreal Engine tools and menus.
- Identified issues in areas such as gameplay, performance, audio, art, and co-op systems.
- Contributed to iterative testing cycles in collaboration with design and dev teams.

Software QA Analyst

TCS (Tata Consultancy Services) - Jun 2015 - Jul 2016

Participated in large-scale enterprise software testing, ensuring reliability and alignment with client requirements through structured manual and automated testing.
